

Grid and cloud computing at INCDTIM

Friday 5 November 2021 11:00 (20 minutes)

Grid and Cloud Computing are two different domain with the same idea, the processing and storing of data. Grid is standardized, Cloud is one step toward standardization through the new European Open Science Cloud (EOSC) project. At INCDTIM we are processing data for the last 15 years at Grid site RO-14-ITIM, but would like to add a cloud computing system at our Institute. This paper describe what we have at the Institute and what projects we are in to fulfil our long last dream of having a cloud at our location

Author: Dr FARCAS, Felix (INCDTIM)

Co-authors: Dr TRUSCA, Radu (INCDTIM); Mr NAGY, Jefe (INCDTIM); Mr ALBERT, Stefan (INCDTIM)

Presenter: Dr FARCAS, Felix (INCDTIM)

Session Classification: RO-LCG 2021 "Grid, Cloud && High Performance Computing in Science" & Cloud Computing and Network Virtualisation
