Automated script-based engine for Apache Kafka messaging system

Friday 22 September 2023 10:40 (20 minutes)

Apache Kafka is a distributed event streaming platform used by thousands of companies worldwide for online data exchange. The system accepts any type of data, and this means that it can be used for varied types of applications. This paper presents an application that allows the user to send or receive different messages via Apache Kafka, either immediately or based on a schedule, using a Javascript-like language for programming.

Authors: BARBULESCU, Lucian-Florentin (University of Craioba); Dr GANEA, Eugen (University of Craiova); Dr ENESCU, Nicolae (University of Craiova)

Presenter: BARBULESCU, Lucian-Florentin (University of Craioba)

Session Classification: Session D

Track Classification: Social Networking and Services
