

Arena Acadnet - An educational platform for practicing and solving coding challenges

Thursday 18 September 2025 12:40 (15 minutes)

Arena Acadnet is an educational platform developed to meet the needs of applied computer science education, offering an interactive environment for solving programming problems, with the goal of stimulating critical thinking and the ability to tackle engineering challenges. It serves as the core for organizing the National Olympiad of Applied Informatics –Acadnet and is structured across multiple user levels, providing tailored features for administrators, problem authors, supervisors, and regular users.
